10 **SEC. 3. SENSE OF THE SENATE.**

11 It is the sense of the Senate that section 561B of  
12 the Federal Food, Drug, and Cosmetic Act, as added by  
13 section 2—

14 (1) does not establish a new entitlement or  
15 modify an existing entitlement, or otherwise estab-  
16 lish a positive right to any party or individual;

17 (2) does not establish any new mandates, direc-  
18 tives, or additional regulations;

19 (3) only expands the scope of individual liberty  
20 and agency among patients, in limited cir-  
21 cumstances;

22 (4) is consistent with, and will act as an alter-  
23 native pathway alongside, existing expanded access  
24 policies of the Food and Drug Administration;

1           (5) will not, and cannot, create a cure or effec-  
2           tive therapy where none exists;

3           (6) recognizes that the eligible terminally ill pa-  
4           tient population often consists of those patients with  
5           the highest risk of mortality, and use of experi-  
6           mental treatments under the criteria and procedure  
7           described in such section 561A involves an informed  
8           assumption of risk; and

9           (7) establishes national standards and rules by  
10          which investigational drugs may be provided to ter-  
11          minally ill patients.
