21                               **TION.**

2       eral Bureau of Investigation has made significant  
3       progress in improving its intelligence capabilities.

9 Manager at the Section Chief and Assistant Special Agent  
10 in Charge (ASAC) level and above, shall be a certified in-  
11 telligence officer.

12          (8) The Director shall, to the maximum extent prac-  
13 ticable, ensure that the successful discharge of advanced  
14 training courses, and of one or more assignments to an-  
15 other element of the intelligence community, is a pre-  
16 condition to advancement to higher level intelligence as-  
17 signments within the Bureau.

18          (d) FIELD OFFICE MATTERS.—(1) In improving the  
19 intelligence capabilities of the Federal Bureau of Inves-

13 **SEC. 205. INFORMATION SHARING.**

14 (a) DEFINITIONS.—In this section:

15 (1) ADVISORY BOARD.—The term “Advisory  
16 Board” means the Advisory Board on Information  
17 Sharing established under subsection (i).

18 (2) EXECUTIVE COUNCIL.—The term “Execu-  
19 tive Council” means the Executive Council on Infor-  
20 mation Sharing established under subsection (h).

21 (3) HOMELAND SECURITY INFORMATION.—The  
22 term “homeland security information” means all in-  
23 formation, whether collected, produced, or distrib-  
24 uted by intelligence, law enforcement, military,  
25 homeland security, or other activities relating to—

1 (A) the existence, organization, capabili-  
2 ties, plans, intentions, vulnerabilities, means of  
3 finance or material support, or activities of for-  
4 eign or international terrorist groups or individ-  
5 uals, or of domestic groups or individuals in-  
6 volved in transnational terrorism;

7 (B) threats posed by such groups or indi-  
8 viduals to the United States, United States per-  
9 sons, or United States interests, or to those of  
10 other nations;

11 (C) communications of or by such groups  
12 or individuals; or

13 (D) groups or individuals reasonably be-  
14 lieved to be assisting or associated with such  
15 groups or individuals.

16 (4) NETWORK.—The term “Network” means  
17 the Information Sharing Network described under  
18 subsection (c).

19 (b) FINDINGS.—Consistent with the report of the Na-  
20 tional Commission on Terrorist Attacks upon the United  
21 States, Congress makes the following findings:

22 (1) The effective use of information, from all  
23 available sources, is essential to the fight against  
24 terror and the protection of our homeland. The big-  
25 gest impediment to all-source analysis, and to a

1 greater likelihood of “connecting the dots”, is resist-  
2 ance to sharing information.

3 (2) The United States Government has access  
4 to a vast amount of information, including not only  
5 traditional intelligence but also other government  
6 databases, such as those containing customs or im-  
7 migration information. However, the United States  
8 Government has a weak system for processing and  
9 using the information it has.

10 (3) In the period preceding September 11,  
11 2001, there were instances of potentially helpful in-  
12 formation that was available but that no person  
13 knew to ask for; information that was distributed  
14 only in compartmented channels, and information  
15 that was requested but could not be shared.

16 (4) Current security requirements nurture over-  
17 classification and excessive compartmentalization of  
18 information among agencies. Each agency’s incentive  
19 structure opposes sharing, with risks, including  
20 criminal, civil, and administrative sanctions, but few  
21 rewards for sharing information.

22 (5) The current system, in which each intel-  
23 ligence agency has its own security practices, re-  
24 quires a demonstrated “need to know” before shar-  
25 ing. This approach assumes that it is possible to

1 know, in advance, who will need to use the informa-  
2 tion. An outgrowth of the cold war, such a system  
3 implicitly assumes that the risk of inadvertent dis-  
4 closure outweighs the benefits of wider sharing.  
5 Such assumptions are no longer appropriate. Al-  
6 though counterintelligence concerns are still real, the  
7 costs of not sharing information are also substantial.  
8 The current “need-to-know” culture of information  
9 protection needs to be replaced with a “need-to-  
10 share” culture of integration.

11 (6) A new approach to the sharing of intel-  
12 ligence and homeland security information is ur-  
13 gently needed. An important conceptual model for a  
14 new “trusted information network” is the System-  
15 wide Homeland Analysis and Resource Exchange  
16 (SHARE) Network proposed by a task force of lead-  
17 ing professionals assembled by the Markle Founda-  
18 tion and described in reports issued in October 2002  
19 and December 2003.

20 (7) No single agency can create a meaningful  
21 information sharing system on its own. Alone, each  
22 agency can only modernize stovepipes, not replace  
23 them. Presidential leadership is required to bring  
24 about governmentwide change.

25 (c) INFORMATION SHARING NETWORK.—

1           (1) ESTABLISHMENT.—The President shall es-  
2           tablish a trusted information network and secure in-  
3           formation sharing environment to promote sharing  
4           of intelligence and homeland security information in  
5           a manner consistent with national security and the  
6           protection of privacy and civil liberties, and based on  
7           clearly defined and consistently applied policies and  
8           procedures, and valid investigative, analytical or  
9           operational requirements.

10          (2) ATTRIBUTES.—The Network shall promote  
11          coordination, communication and collaboration of  
12          people and information among all relevant Federal  
13          departments and agencies, State, tribal, and local  
14          authorities, and relevant private sector entities, in-  
15          cluding owners and operators of critical infrastruc-  
16          ture, by using policy guidelines and technologies that  
17          support—

18                 (A) a decentralized, distributed, and co-  
19                 ordinated environment that connects existing  
20                 systems where appropriate and allows users to  
21                 share information among agencies, between lev-  
22                 els of government, and, as appropriate, with the  
23                 private sector;

1 (B) the sharing of information in a form  
2 and manner that facilitates its use in analysis,  
3 investigations and operations;

4 (C) building upon existing systems capa-  
5 bilities currently in use across the Government;

6 (D) utilizing industry best practices, in-  
7 cluding minimizing the centralization of data  
8 and seeking to use common tools and capabili-  
9 ties whenever possible;

10 (E) employing an information access man-  
11 agement approach that controls access to data  
12 rather than to just networks;

13 (F) facilitating the sharing of information  
14 at and across all levels of security by using pol-  
15 icy guidelines and technologies that support  
16 writing information that can be broadly shared;

17 (G) providing directory services for locat-  
18 ing people and information;

19 (H) incorporating protections for individ-  
20 uals' privacy and civil liberties;

21 (I) incorporating strong mechanisms for  
22 information security and privacy and civil lib-  
23 erties guideline enforcement in order to enhance  
24 accountability and facilitate oversight,  
25 including—

1 (i) multifactor authentication and ac-  
2 cess control;

3 (ii) strong encryption and data protec-  
4 tion;

5 (iii) immutable audit capabilities;

6 (iv) automated policy enforcement;

7 (v) perpetual, automated screening for  
8 abuses of network and intrusions; and

9 (vi) uniform classification and han-  
10 dling procedures;

11 (J) compliance with requirements of appli-  
12 cable law and guidance with regard to the plan-  
13 ning, design, acquisition, operation, and man-  
14 agement of information systems; and

15 (K) permitting continuous system up-  
16 grades to benefit from advances in technology  
17 while preserving the integrity of stored data.

18 (d) IMMEDIATE ACTIONS.—Not later than 90 days  
19 after the date of the enactment of this Act, the Director  
20 of the Office of Management and Budget, in consultation  
21 with the Executive Council, shall—

22 (1) submit to the President and to Congress a
