3       **SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “National Cybersecurity  
5       Awareness Act”.

6       **SEC. 2. FINDINGS.**

7       Congress finds the following:

8               (1) The presence of ubiquitous internet-con-  
9       nected devices in the everyday lives of citizens of the  
10       United States has created opportunities for constant  
11       connection and modernization.

1           (2) A connected society is subject to cybersecu-  
2           rity threats that can compromise even the most per-  
3           sonal and sensitive of information.

4           (3) Connected critical infrastructure is subject  
5           to cybersecurity threats that can compromise funda-  
6           mental economic and health and safety functions.

7           (4) The Government of the United States plays  
8           an important role in safeguarding the nation from  
9           malicious cyber activity.

10          (5) A citizenry that is knowledgeable regarding  
11          cybersecurity is critical to building a robust cyberse-  
12          curity posture and reducing the threat of cyber  
13          attackers stealing sensitive information and causing  
14          public harm.

15          (6) While Cybersecurity Awareness Month is  
16          critical to supporting national cybersecurity aware-  
17          ness, it cannot be a once-a-year activity and must be  
18          a sustained, constant effort to raise awareness about  
19          cyber hygiene, encourage individuals in the United  
20          States to learn cyber skills, and communicate the  
21          ways that cyber skills and careers in cyber advance  
22          individual and societal security, privacy, safety, and  
23          well-being.
